

## AI Video Creation Workflow – Story 3: Bob Campana's Around-the-World Journey

### Project Objective

Create a 60-second AI-generated storytelling video based on Bob Campana's 1975 world travel experience, highlighting how exposure to different cultures transformed his perspective on opportunity and success.

#### Step 1: Story Analysis

Read and understand the provided story.

Identify key moments that drive the narrative.

Break the story into 10 visual scenes.

##### Selected Scenes

Leaving California

Arrival in Jakarta Mansion

Rural Indonesia Exploration

Village Life Experience

Arrival in New Delhi

Reflection in Varanasi

Trek Through Nepal

Beirut Airport During Conflict

Arrival in Paris

Realization at San Francisco Airport

#### Step 2: Character Design

Created a consistent visual identity for Bob Campana:

21-year-old American traveler

Short brown hair

Clean-shaven appearance

Slim build

Light blue denim shirt

Khaki pants

Hiking boots

Vintage 1970s backpack

A reference image was used to maintain character consistency across all scenes.

#### Step 3: AI Image Generation

Tools Used:

ChatGPT for prompt creation

AI image generator for scene creation

Generated 10 cinematic images representing the major events of Bob's journey.

#### Step 4: AI Video Generation

Tool Used:

Google Flow

Each image was converted into a 5–6 second animated video clip using image-to-video prompts.

Animation Elements:

Slow camera movement  
Character motion  
Environmental movement  
Cinematic storytelling style

Total clips generated: 10

Step 5: Voiceover Creation

Generated a 60-second narration covering:

Bob's departure from California  
Experiences in Indonesia  
Cultural discoveries in India  
Adventure in Nepal  
Escape from Beirut  
Final realization in America

Voiceover created using AI text-to-speech technology.

Step 6: Video Editing

Tool Used:

VN Video Editor

Editing Process:

Imported all 10 video clips.  
Arranged clips according to story sequence.  
Added AI voiceover.  
Added subtitles.  
Added background music.  
Adjusted transitions and timing.  
Exported final video.

Step 7: Final Output

Video Length:

60 Seconds

Video Format:

MP4

Style:

AI-generated cinematic storytelling documentary

Key Message:

Travel transformed Bob Campana's perspective and helped him recognize the extraordinary opportunities available to him, ultimately shaping his future outlook on life and success.

AI Tools Used

ChatGPT

AI Image Generator

Google Flow

AI Voice Generator

VN Video Editor

Outcome

Successfully created a complete AI-generated short-form video that combines storytelling, AI imagery, animation, voiceover, subtitles, and editing into a compelling 60-second narrative.
